SECTION 01 /

Taking Care of Your Devices

A. Hardware & Physical Care

The Do's

- **Open from the Centre:** Always lift the lid from the middle of the top edge. This distributes pressure evenly across both hinges.
- **Clear the Keyboard:** Before closing the lid, double-check that no pens, paperclips, or USB drives are sitting on the keyboard.
- **Use Two Hands:** When moving across the classroom, carry the laptop with two hands and keep the lid closed.
- **Stable & Hard Surfaces:** Only work on flat, hard surfaces.
- **Proper Cable Coiling:** When storing your charger, gently wrap the wire in a loose loop. Avoid tight winding or "kinking" the cable near the connector, as this breaks internal wires.
- **Brightness/Battery:** A "Do" could be keeping brightness at 50% - 70% to extend the health of the backlight and battery.

The Don'ts

- **No Cushions or Foam:** Never place the laptop on a rug, cushion, foam, or bed. These soft materials block the cooling vents, leading to rapid overheating and internal damage.
- **Don't Lift by the Screen:** Never pick up the laptop by the display panel. This strains the hinges and damages the LCD.
- **Don't Open from the Side:** Avoid grabbing a corner to flip the lid open, which can cause the hinge to snap.
- **Don't Eat or Drink Nearby:** Spills are the most common cause of "total loss." Keep liquids at a distance.
- **Don't Stack Books:** Heavy items on a closed laptop can cause permanent "key marks" or white spots on the screen.
- **Screen Cleaning:** Don't use window cleaner or harsh chemicals. Use a dry microfiber cloth only.
- **Temperature Extremes:** Do not leave the laptop in direct sunlight (e.g., near a window), as heat is the #1 killer of batteries.

B. Software, Maintenance & Battery Care

The Do's

- **Restart Weekly:** A full restart clears the system cache and ensures security updates are installed.
- **Safe Ejecting:** Always "Safely Remove" USB drives to prevent data corruption.
- **Immediate Reporting:** Report any hardware or software glitches immediately. Devices are under warranty; late reporting may result in the issue falling outside of coverage.

The Battery Scenarios (Optimizing Lifespan)

- **Scenario A:** All-Day Desk Use: If you are near an outlet all day, it is healthier to keep the charger plugged in. Modern laptops use "passive charging," meaning once the battery is full, the device runs directly on AC power from the wall. This saves the battery from unnecessary charge/discharge cycles.
- **Scenario B:** On-the-Go Use: If you are away from an outlet, aim to keep your battery between 50% and 80%.
    - **The 80% Rule:** Lithium-ion batteries are "stressed" when pushed to the absolute 100% limit or drained to 0%. Keeping it in the middle threshold significantly extends its total lifespan.
    - **The 20% Floor:** Never let your device drop below 20%. Deep discharges cause chemical strain that can lead to permanent capacity loss.

The Don'ts

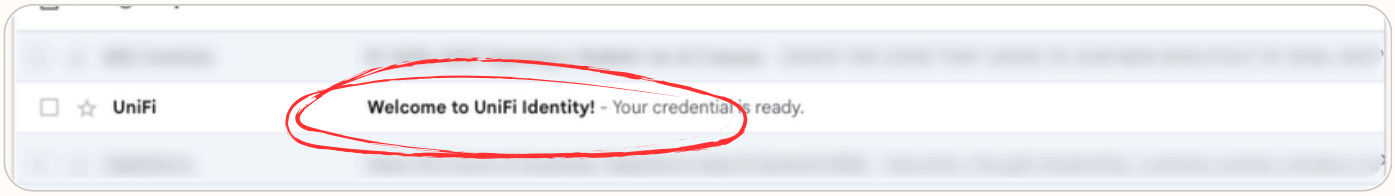

- **Don't Use Personal USBs Carelessly:** Avoid unverified drives that might compromise the school network.
- **Don't Leave it Plugged in 24/7:** Let the battery discharge occasionally to preserve its lifespan.

SECTION 02 /

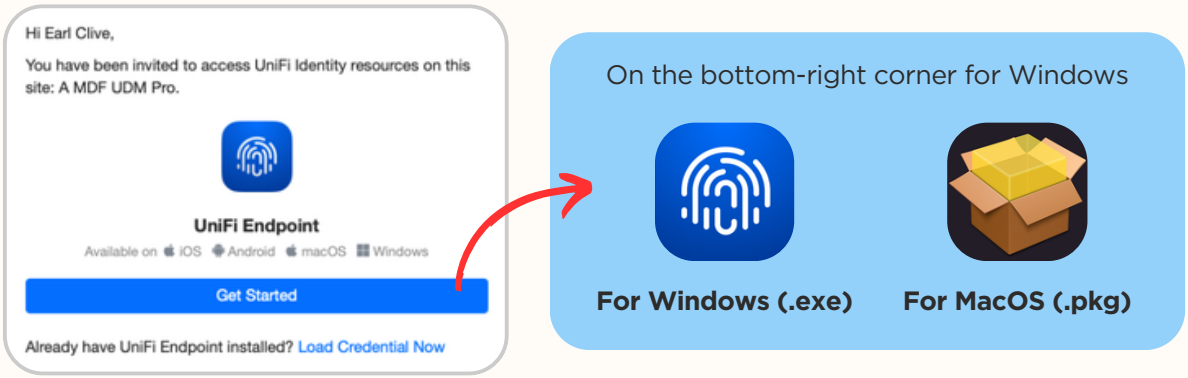

Connecting to School Wifi

A. Installation and Setup : Desktops & Laptops

01. Open your Gmail account and look for the **UniFi Welcome Email**.

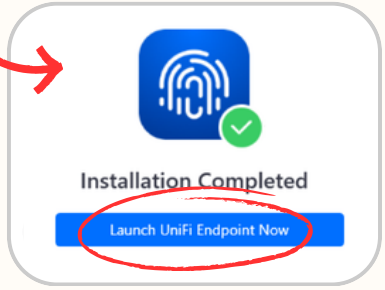

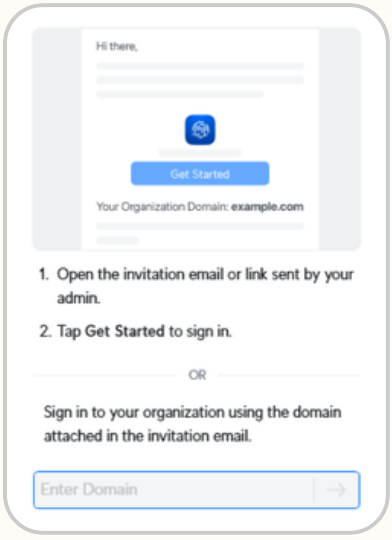

02. Click **Get Started** and allow the downloadable file to finish downloading.

03. Open the downloaded file and **follow your device's installation instructions**.

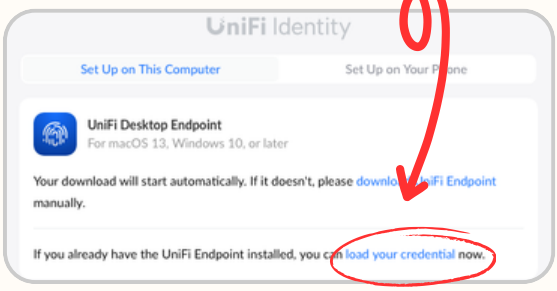

04. After installation, click **Launch UniFi Endpoint Now**.

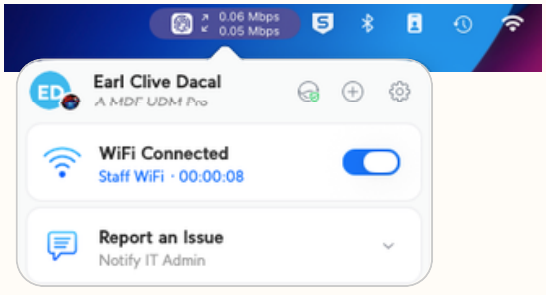

05. Go back to your the UniFi email (step 1) and click **Load Credential Now**.

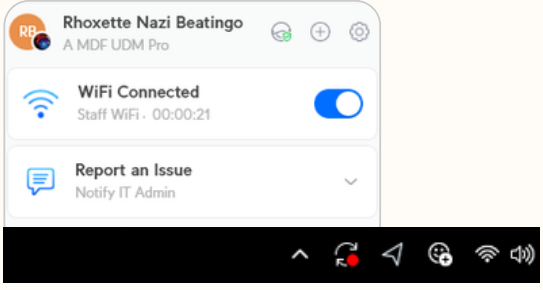

On the new opened browser, click **load your credential now**.

06. Once the credential is loaded, a **small app tray will open** depending on your device. **You are now connected**.

On the top-right corner for MacOS

On the bottom-right corner for Windows

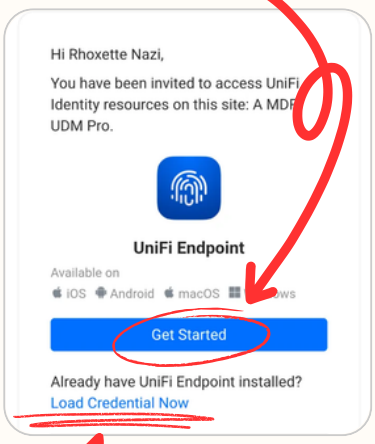

SECTION 02 /

Connecting to School Wifi

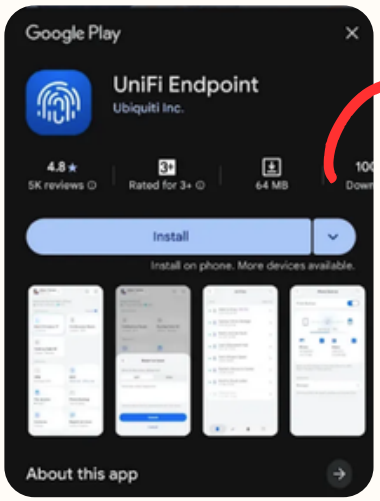

B. Installation and Setup : Phones & Tablets

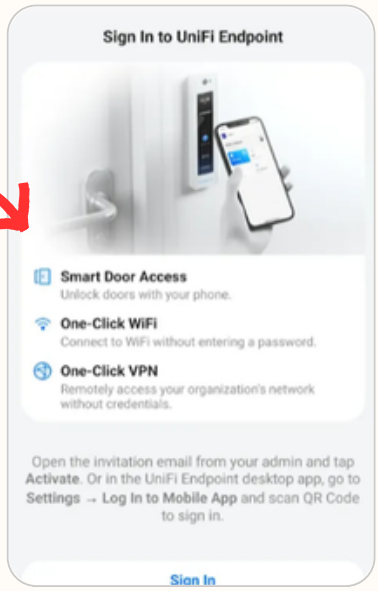

For Apple users you need to be on iOS 17.0 or latest.

01. Open your Gmail app and look for the **UniFi Welcome Email** and click **Get Started**.

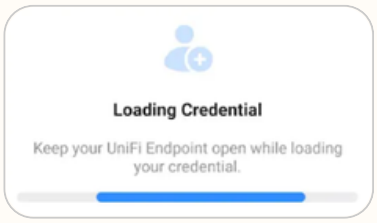

02. Install and open the application.

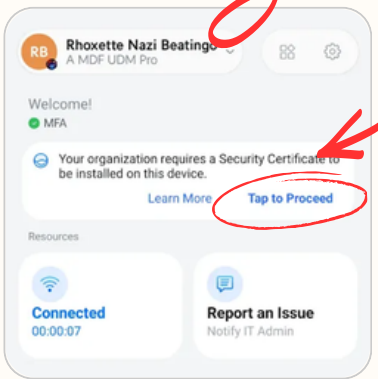

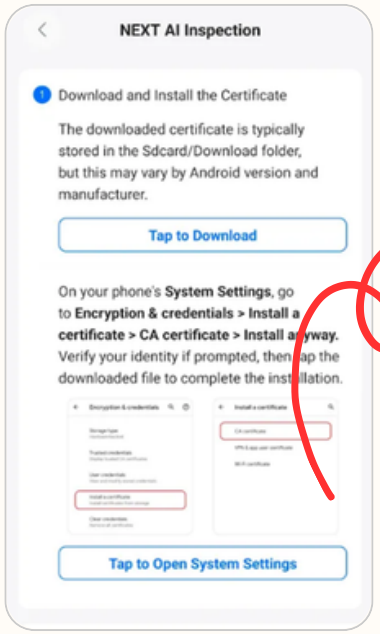

03. Go back to your UniFi email (step 1) and click **Load Credential Now**.

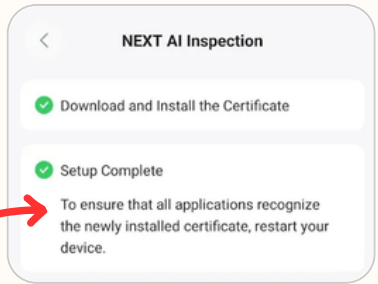

04. Allow the app to load credentials. Next, click **Tap to Proceed**.

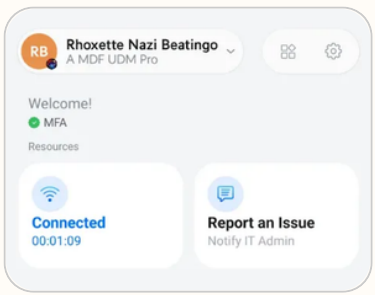

05. Then, read and follow the steps. **Make sure setup is complete.**

06. Check if you are connected to the network, and you are done!

Should you have any problems with connecting your device, you can reach us out through Gchat or drop by the IT lounge.

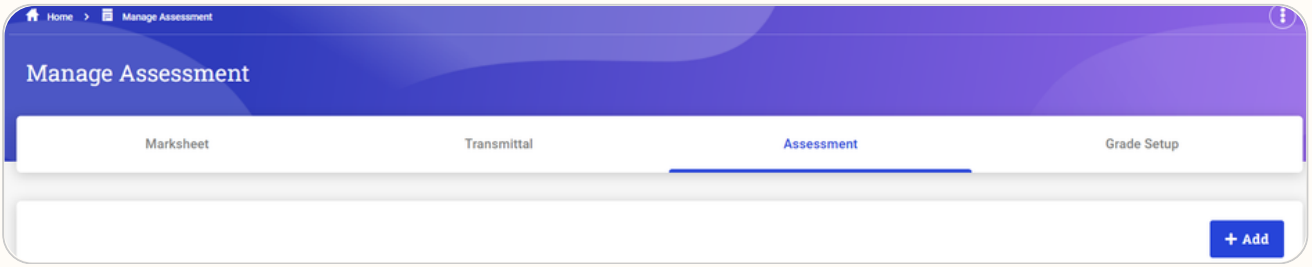

SECTION 03 /

Resetting Your Password

Step 1: Creating Assessment

Locate the assessment & gradings function through:
Modules>Learnung Management System>Assessment & Gradings>Manage Assessment & Gradings.

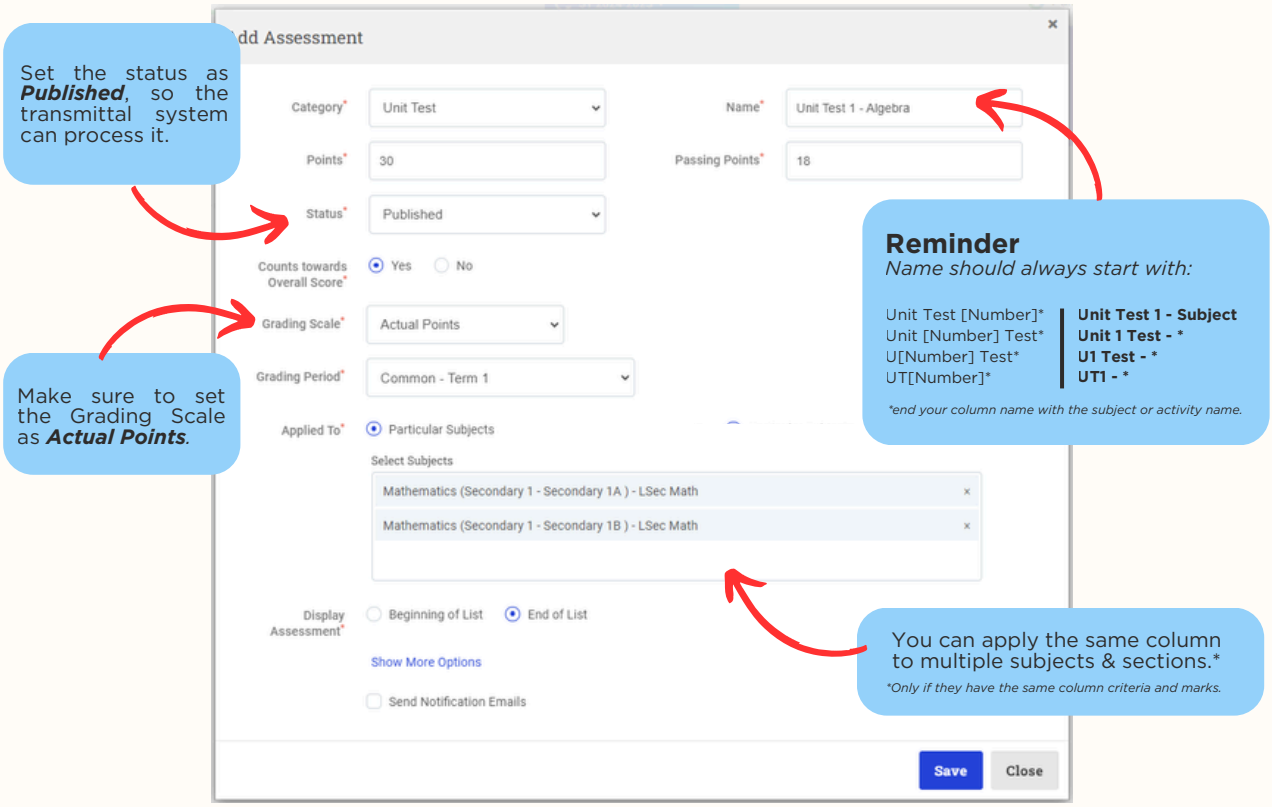

You should be able to see four tabs: Marksheet | Transmittal | **Assessment** | Grade Setup

Step 2: Assessment Tab

Click on the Assessment tab. You should be able to see all the created assessments. To create a new one, click on the + Add A pop-up will appear where you will add the necessary information.

Make sure to click save to create the assessment column.

Step 3: Start Recording

You can now go to the first tab: **Marksheet** and start recording your pupils' marks. Don't forget to click **save**, to save your progress.

SECTION 03 /

Locking Assessments for Transmittal

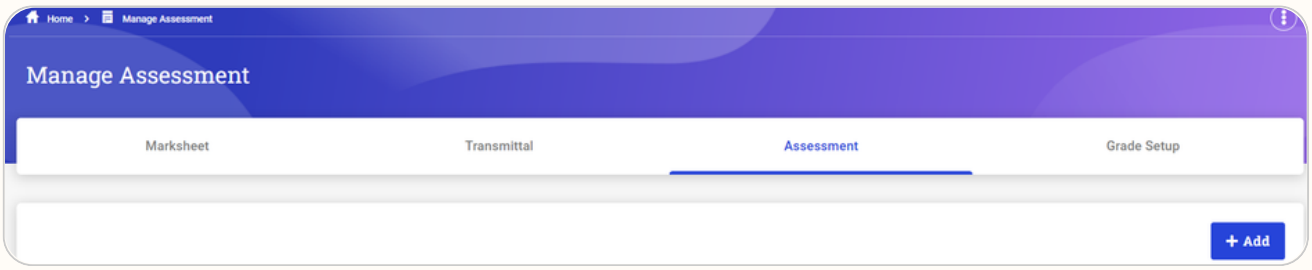

Step 1: Sign-in with your ADMIN account

Login to your Classe365 account **using your SSC email address**.

Step 2: Managing Assessments

Locate the assessment & gradings function through:
Modules>Learning Management System>Assessment & Gradings>Manage Assessment & Gradings.

You should be able to see four tabs: Marksheet | Transmittal | **Assessment** | Grade Setup

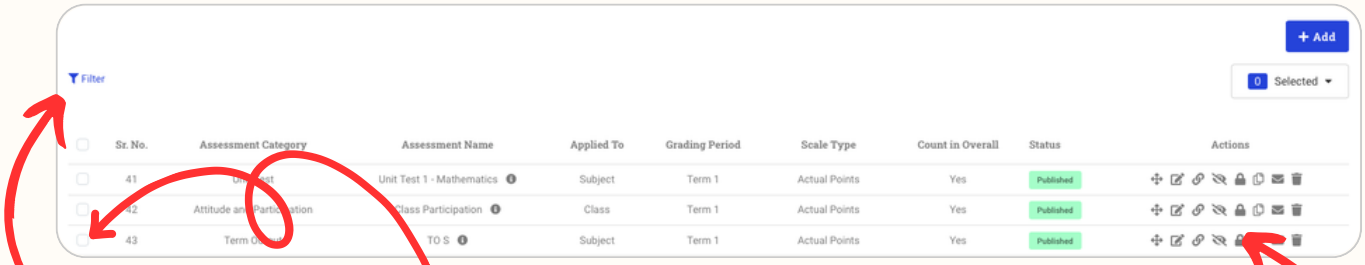

Step 3: Locking Assessments

There are two ways to lock the assessments.

1. Individual locking
2. Bulk locking

Make sure to only edit, delete, update or lock the assessments relevant to your department.

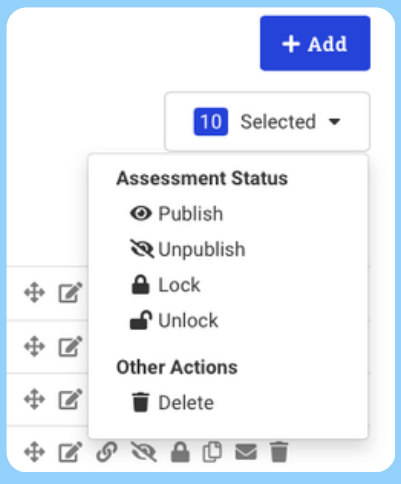

Filtering List

To easily lock assessments, you can filter the list based on the year level, section, subject and term.

Bulk Locking

Tick the box to select multiple assessments to lock. You can also tick the top-most box beside 'Sr. No.' to select all assessment items.

Then click on the dropdown below the **+Add** button to bulk lock assessments.

Individual Locking

Click on the lock icon under actions to lock the assessment.

If you accidentally locked an assessment, you can easily unlock it by clicking the same icon.

If you have any questions, you can reach us out through Gchat or drop by the IT lounge.
